

Simplifying Device Lifecycle Management

Abe360 provides comprehensive support and services throughout the lifecycle of all of your mobile assets. By leveraging a standardized Enterprise Mobile Management (EMM) platform, Abe360 simplifies end-to-end management of tablets, scanners, printers, mobile computers, and other devices.

From device selection, configuration, staging and deployment to actionable reporting, OS maintenance, security patches, RMA support and beyond, Abe360 enables full control of all of your devices from a single, unified platform.

Device Lifecycle

Abe360 support and services cover every phase of your devices' lifecycle journey. We're with you every step of the way to relieve the burden of MDM, deliver cost savings, and ensure maximum uptime to keep your operations moving.

1. DEVICE SELECTION

Our team recommends optimal devices based on industry and application.

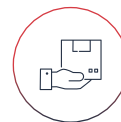

2. PROCUREMENT

Our experts streamline procurement, empowering IT teams with data-driven choices.

3. PROVISIONING

AbeTech ensures devices are fully optimized and customized to meet your specific needs.

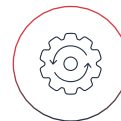

4. DEPLOYMENT

Our turnkey solutions save time, resources, and enable rapid deployment.

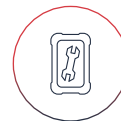

5. SERVICE

Proven standardized & tier 2 helpdesk ensures swift issue resolution for maximum uptime.

6. ONGOING SUPPORT

Ongoing support ensures device optimization, maximizing uptime and relieving IT burden.

7. REPAIR

Quick device swaps and a streamlined RMA process ensure operational resilience.

8. REFRESH

Comprehensive guidance and support with best practices across the device lifecycle.

Allow your team to focus on more critical tasks

Abe360 is a robust device lifecycle management solution that can help save your organization valuable time and resources. By managing each step the device lifecycle, Abe360 can plan, procure, enroll, provision, deploy, manage and retire your devices effectively and cost efficiently.

Do You Have Enough Room for Device Staging?

AbeTech offers dedicated facilities for provisioning hundreds of devices simultaneously, incorporating over 20 years of established methodology and real-time project dashboards to track progress and timelines. Benefit from our expert deployment teams to **save time and optimize space**.

Can Your Device Provisioning Keep Up?

With Abe360, device provisioning takes only 2-3 minutes using a single barcode scan. Real-time remote control and root access improves support by reducing service tickets, **saving resources and boosting worker productivity**.

How Consistent is Your Device Management?

Abe360 integrates diverse systems to ensure device standardization and seamless updates, reducing the need for manual adjustments and **saving valuable time**. Devices appear uniform to end users while remaining secure.

Is Your Digital Asset Management Up to Speed?

Abe360 digitally captures and stores device attributes, enabling real-time asset management through effortless turnkey or customized reporting and troubleshooting. This ensures **instant access and simplifies the review process**.
