Device Lifecycle Management – Simplified

Streamline management of your business-critical industrial and mobile devices with Abe360

Organizations are leveraging the power of IoT to operate more efficiently, deliver better customer experiences, gather insights and improve decision-making around their business performance.

Although business-critical devices are built to reduce operating costs and improve productivity, device downtime will cost your organization loss of visibility into operations, lost revenue and ultimately lead to a negative client experience.

As an extension of your IT organization, Abe360 enables your team to consolidate critical activities including task automation in order to improve efficiency and see an overall reduction in operational costs. Here's how:

- Improves productivity by automating repetitive & redundant tasks
- Eliminates inaccuracies & inconsistencies in manual processes
- Increases accountability of all stakeholders with clearly defined roles and responsibilities
- Increases employee satisfaction by automating mundane tasks
- Improves customer service quality by reducing system downtime

Abe360 is designed for organizations with:

- Over-tasked IT resources
- 20 – 50,000+ devices
- Multiple locations
- Multiple device types

IT organizations are tasked by deploying tools and processes to gather device information, monitor various aspects of the devices health and forecast problems before they occur.

A unified platform for all devices

Bring predictability, optimization and visibility to all the devices in your mobility program – from printers and scanners, to mobile computers and more.

Maximize operational budget by optimizing your complex technology needs.

Abe 360 – A standardized Enterprise Mobile Management (EMM) platform, designed to optimize your complex technology needs, reduce workflow disruptions, and lower costs.

- Manufacturer-agnostic management of all printers and devices
- Single platform to manage your organization's mobility and IoT initiatives
- Reduce maintenance and resource costs with smart device configuration
- Troubleshoot and resolves issues by accessing printer endpoints
- Support new printers without the need for software updates or additional code
- Reduce downtime with automation rules when pre-defined conditions are met

With Abe360, you finally get the opportunity to work with technology the way it was intended. From complex systems to daily print management needs, Abe360 delivers specific solutions to meet growing technology needs and reduce your TCO.

- Simplified Device Lifecycle Management
- Actionable Insights for Your Endpoint Devices
- Track and Manage Orders in One Place
- IT Help Desk Support Accelerated
