Device Lifecycle Management – Simplified

Streamline mobile device management with Abe360

Although business-critical devices are built to reduce operating costs and improve productivity, device downtime will cost your organization loss of visibility into operations, lost revenue and ultimately lead to a negative client experience.
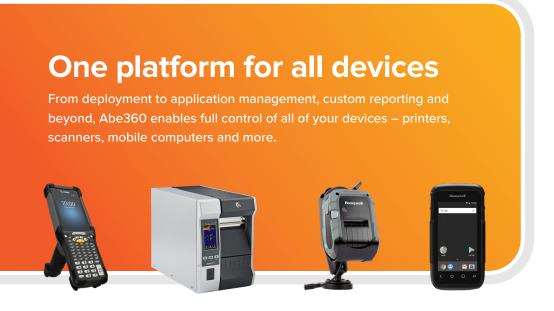

IT organizations are tasked with deploying tools and processes to gather device information, monitor various aspects of the devices health and forecast problems before they occur. This includes time-consuming and costly tasks that take valuable IT resources away from business-critical needs.

Abe360 is an extension of your IT department. By standardizing your enterprise mobility infrastructure, and empowering your team with additional tools, they can focus on business-critical activities. Abe360 offers:

- Dedicated skilled resources
- Access to certified engineers who configure mobile environments every day
- Standardized device delivery
- User-friendly client portal with actionable reporting
- Order tracking
- RMA processing
- Standardized device lifecycle

Abe360 is designed for organizations with:

- Over-tasked IT resources
- 20 – 50,000+ devices
- Multiple locations: warehouse/ manufacturing, in the field, work from home, etc.
- Multiple device types (mobile devices, tablets, printers, etc.)

One platform for all devices

From deployment to application management, custom reporting and beyond, Abe360 enables full control of all of your devices – printers, scanners, mobile computers and more.

Empower your IT team with one management interface for all applications.

Abe360's standardized Enterprise Mobile Management (EMM) platform is designed to optimize your organization's complex technology needs, reduce operator downtime and product distribution delays.

Support Matrix
- Standard, flexible document with defined steps
- First call resolution
- Eliminate unrelated questions
- Reduce operator downtime

Change Controls
- Pro-active communication
- Maintain production integrity
- Allow for proper resource allocation

Support Cadence
- Alignment with changes
- Device OS optimization
- EMM server updates
- Application updates

With Abe360, you finally get the opportunity to work with technology the way it was intended. From complex systems to daily print management needs, Abe360 delivers specific solutions to meet growing technology needs and reduce your TCO.

Let's start with a free 10-minute conversation.
We can learn about your specific environment and needs and you can learn about our process and Abe360. If it's a fit, we'll set up a in depth strategy session with key stakeholders.
