# AUTOMATED LABELING INSPECTION QUALITY CONTROL

ABETECH

Improve your quality control by automating your packing and manufacturing processes.
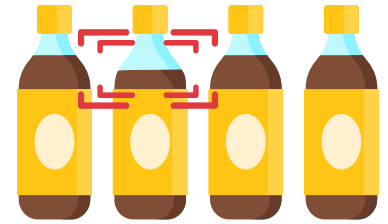

LABELING

Automated label systems apply pre-printed or print-on-demand labels to products, boxes or pallets.

RESULT: Ensure consistent label placement
Reduce labor costs
Increase throughput

INSPECTION

Identify defects, irregularities and other manufacturing flaws.

RESULT: Prevent assembly errors
Detect defects, flaws, contaminants
Check fill level, feature presence, count

GAUGING

Measure distances and locations to assess specification compliance.

RESULT: Verify that product measurements meet specifications and identify those that do not.

IDENTIFICATION

Vision enabled technologies read codes and alphanumeric characters.

RESULT: Improved traceability of inventory with manufacturer, product identification, lot number and unique serial number.

BENEFITS OF WORKING WITH ABETECH

- **Satisfy regulatory compliance mandates**

  Quality inspection that meets international regulatory compliance standards.

- **Reduce risk of recalls**

  Protect your customers and your brand's reputation with a proven technology partner.

- **Cut operational costs and increase productivity**

  Our experienced teams can be deployed anywhere in the world to install quickly and professionally.
