

Experience Intelligent Automation in your Logistics Process With Zebra's New Fixed Scanners and Machine Vision

Without the proper scanning power, your manufacturing plant runs the risk of inaccurate sortments and invalid labels.

Boost your product management accuracy

when you strengthen facilities with Zebra's Fixed Scanners and Machine Vision - scanning intelligence made for:

Easy to set up, deploy, and run

Proven industry-leading technologies

Seamless upgradeability so you can add features with a software license

One software platform to manage the entire portfolio

Compact networkable scanning and comprehensive features

Track assembly with an imaging solution that integrates:

PRZM Intelligent-Imaging for first-time every-time data capture

Liquid Lens for standard 30 degree and wide angle 46 degree

Modular and powerful illumination with white, red, blue, IR or combined LED boards

Ultra-rugged and durable design

User Interface with auto-tune and Status-LEDs

10 GB Storage Memory

Enhance your quality control processes with AbeTech's Tevia

that solves mispackaging and avoids recalls with features like:

- 1 Multiple teach/comparison modes
- 2 Remote teaching, controlling, and monitoring
- 3 Access control with multiple levels
- 4 Simple and robust design
- 5 User-friendly color interface
- 6 Compatible with any camera

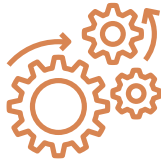

Combine Zebra and AbeTech for a solution that ensures proper product management.

The Tevia and new fixed scanners join for an ultimate solution that:

Enhances inventory
visibility

Advances your
automation

Ensures next-level
accuracy in your
line operation

Brings more
versatility and
power to loading

Discover the duo that redefines industrial scanning.
