

How *GateKeeper* Integrates with Your Existing ERP/WMS/MES Systems

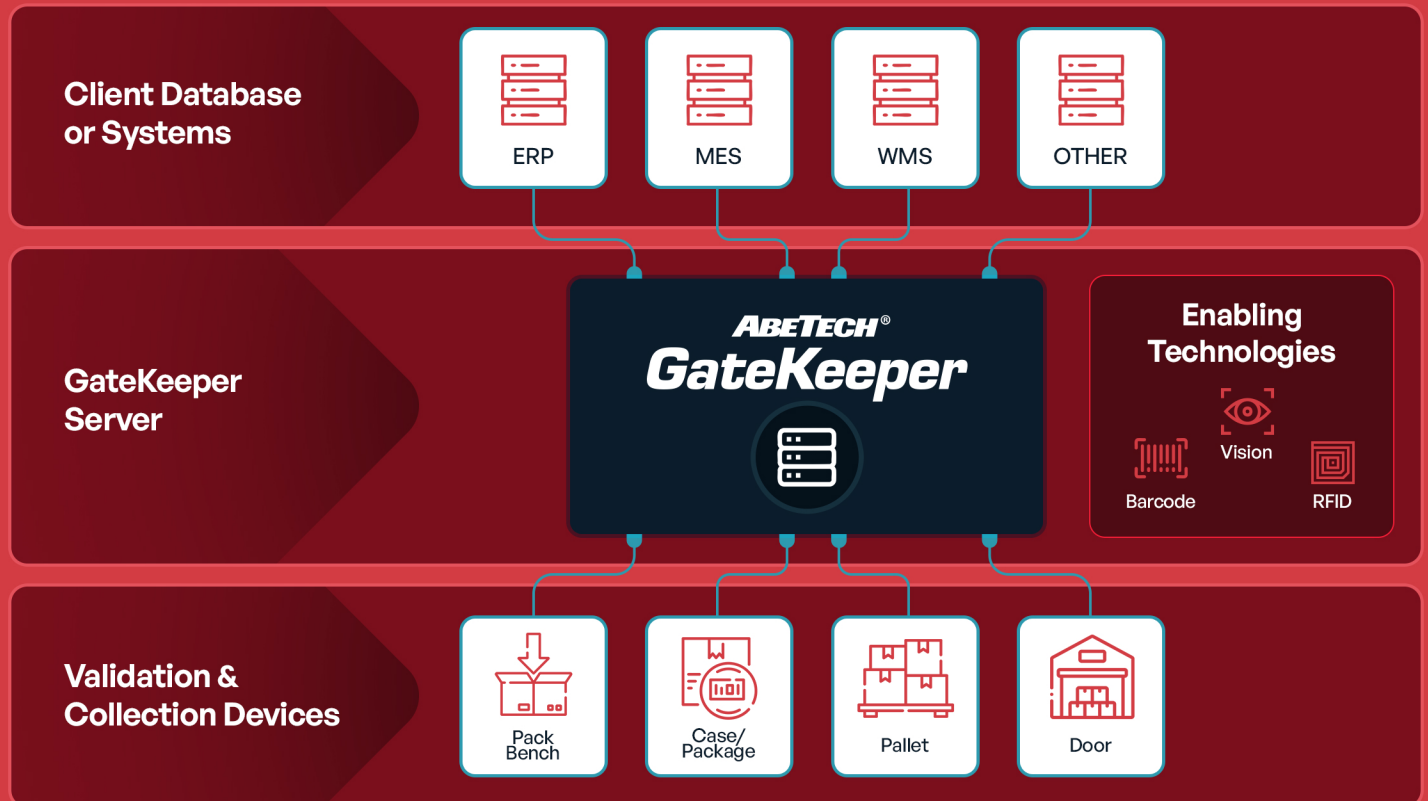

Whatever Your System, GateKeeper Integrates With It.

We can integrate with the API of any ERP/WMS/MES or you can use our GateKeeper Server API—the choice is yours!

Meet GateKeeper Server: The Key to Seamless Integration

GateKeeper Server is the central hub for your network, providing a single integration point with your ERP, WMS, or MES via API. It manages all GateKeeper devices, centralizes data from barcode scans and RFID, and offers a "single pane of glass" for monitoring system status, health, and critical metrics—anytime, anywhere.

Seamless Integration Means More Benefits for You

Fast Deployment:

Fast-track implementation by leveraging your existing APIs.

Flexible Integration:

Use our existing API for integration, or let our engineers build a tailored solution for your systems.

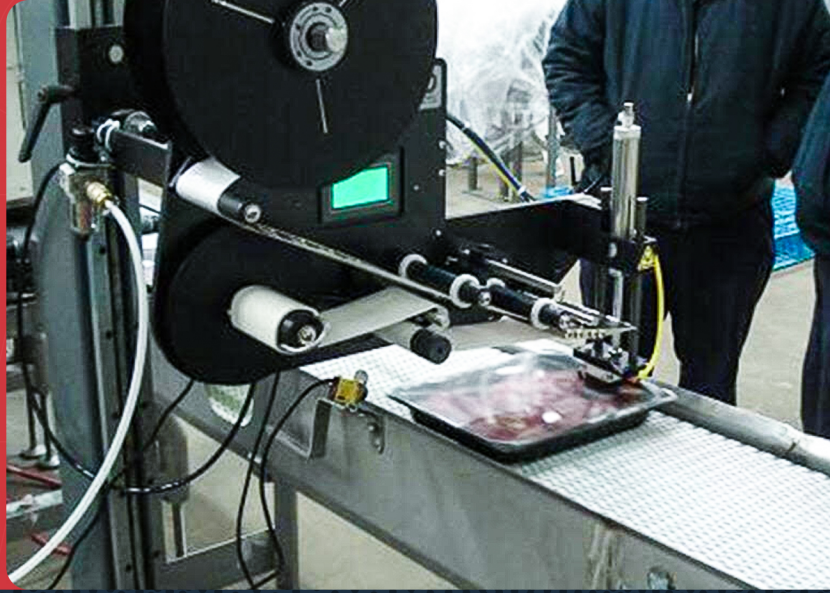

Actionable Data:

Data is delivered back to your host system where you can take action immediately.

GateKeeper Integration in Action for a Food Manufacturer

GateKeeper was integrated with a food manufacturer's existing reject stations to scan and verify primary packaging labels and case-level labels, leading to **efficient rejection of faulty labels and compliance with labeling requirements.**

Powered by industry-leading machine vision and fixed industrial camera technology for unmatched precision and reliability.

Delivers superior barcode and label accuracy, reducing costly compliance errors.

Optimized for high-speed operations, ensuring seamless integration into demanding workflows.

Designed for durability and performance in the most challenging environments.

Trusted by top manufacturers and logistics providers for cutting-edge automation.

Do More With What You've Got!

With GateKeeper, integration is effortless, transforming your systems and technologies into a faster, smarter, more connected network.
